

Microsoft Fabric for Government

Centralize agency data for real-time leadership visibility and faster responses to legislative and audit requests.

EXECUTIVE SUMMARY

Your agency reports performance, compliance, and budget data to multiple oversight bodies. Each report is built manually from separate systems. Staff spend weeks collecting data for reports that are outdated before they are delivered. Microsoft Fabric centralizes your agency's data into one governed analytics platform. Leadership see current budget, operations, and compliance performance without waiting for a manual report cycle.

THE BUSINESS PROBLEM

Government agencies are accountable to legislators, oversight bodies, and the public for their performance, budget use, and compliance. Meeting these accountability requirements means producing accurate, consistent reports from multiple data systems that rarely share information. Building each report manually takes weeks of staff time and introduces errors along the way. Budget pressure and staff reductions make manual reporting increasingly difficult to sustain.

HOW ARMELY SOLVES IT

Armely helps your agency **reduce reporting burden and improve accountability** by using **Microsoft Fabric** to integrate budget, HR, program operations, and compliance data into one governed analytics platform. Leadership accesses real-time dashboards instead of waiting weeks for manually assembled report and your staff redirects that time toward mission delivery.

BUSINESS OUTCOMES

- Reduce report preparation time by **60 to 70%**
- Provide real-time budget and performance dashboards for agency leadership
- Improve accuracy and consistency of legislative and compliance reports
- Consolidate data from multiple departmental systems into one governed platform
- Support FOIA responses and audits with clean, organized, and documented data

Industry Scenario

Legislative Reporting — State Agency

A state agency integrates budget, HR, and program performance data into Microsoft Fabric. The agency CFO has same-day visibility into spending against budget across all departments. The next legislative audit requires 80% less staff time to prepare for, all supporting data is already organized, current, and accessible.

WHY THIS MATTERS NOW

Budget pressure and staff reductions require agencies to deliver more with the resources they have. Manual reporting is one of the highest-cost, lowest-value activities in government. Centralizing analytics frees staff to focus on mission delivery and service improvement. AI tools for program performance and forecasting also require the kind of clean, unified data that Fabric provides.

RECOMMENDED NEXT STEP

Schedule a reporting and data readiness review with your IT director or budget officer this week. If you want Armely to run that review with you, contact us at info@armely.com or **972-460-0643**. We can turn around a findings report within **5 business days**.

Armely is a certified HUB (Historically Underutilized Business) and Small Business vendor.
